Maps on Events

Submitted by Steve Hanson on December 5, 2016 - 9:40pm

Well, it's always something.

Fixed - life is happy again

Events that have been added to the site recently don't end up with maps being generated. This is due to some changes that Google has made to their API's - and the code that generates coordinates for the maps is at the moment broken. I am chasing down a resolution to the problem - but it may be another day or two.
