All,

I believe the board would be shortsighted to consider making masks mandatory. I am fully supportive of anyone who wishes to wear masks. Though making masks mandatory, may help stop the spread of COVID-19, mandatory vaccination would certainly be more effective. If the schools won't require vaccinations, how can they justify requiring masks?

I believe they have also failed to consider the damage to the mental health of students. Teenage suicide is already at an all time high and has seen a significant spike in the last two years. So, parents are given the choice of removing children from school and further isolating them or subjecting them to wearing a mask. Neither of these options is conducive to the mental health of children.

I request the school board consider the whole well being of the student body, instead of a single aspect of it.

James Dimock
